

JERRY QUAYLE & ASSOCIATES LTD

Company Profile

Date: March 2019

Jerry Quayle & Associates Limited

ABOUT US

Following the success of the original company JPQ International Consultants Ltd in May 2011, Jerry Quayle has formed a new broader range business to take advantage of the opportunities the original success has brought to Jerry. That company is **Jerry Quayle & Associates Ltd**. Since 1995 Jerry has worked at increasingly senior levels in a number of the major testing and certification bodies in the UK and abroad¹. Jerry's working life covers a wide range of construction-based activities including research and testing for more than 4 decades.

Jerry formed relationships with a range of testing and certification bodies during his time in the industry and these relationships are being put into good use through Jerry Quayle & Associates Ltd

The business also has associations with other bodies around the world and is therefore; able to offer a great deal of depth in its coverage of international standards in the areas of passive fire protection and the certification of those products via a liaison with a number of certification bodies globally.

OUR SERVICES

With 40 plus years of construction and research based knowledge, which includes more than two decades in the testing and certification arena and several decades of knowledge from the Associates within the company, Jerry Quayle & Associates, offers a wide range of services, some of which are listed below:

- Technical consultancy of all types of fire door
- Fire door in service inspections
- Project management for the testing of fire rated elements
- Project management of 3rd party applications for product certification.
- Independent auditing for Factory Production Control for a wide range of construction products.
- Product engineering evaluation and assessments for local and international approval.
- Training on passive fire products
- Contract inspection and auditing of QA systems
- Construction Production Regulation advice
- Market advice EMEA
- Fire Door inspection services
- Blast resistance calculations and fabrication of approved doorsets
- Ballistic protection in doors and windows and fabrication of approved doorsets and windows.
- Timber Frame manufacture and CE Marking of factory produced panels

The above highlights some of the skills and services offered by the company, however, this is by no means an exhaustive list.

INTERNATIONAL

For more than 20 years, Jerry Quayle, has been involved in the fire resistance, fire door and glazing industry (with various bodies) in the UK and EU plus the Middle East & North Africa region (MENA) & APAC. He is a well-known figure to a great deal of the manufacturers, Consultants and Regulators in the UK and MENA regions. With this considerable penetration into the overseas markets, the company, offers a great deal to those seeking to open a foot hold in the market but also those that are in the market and wish to expand.

In recent times, Jerry, has assisted clients to gain product acceptance in the UK, Lebanon, Oman, UAE, KSA and Qatar and is working with others in a number of countries including the UAE to extend their field of operation and product supply. In addition, with associates both in the UK and USA, the company can offer a great deal more than many of the single market, single code consultants can, as their view is often confined by local knowledge.

UK MARKETS

Since the introduction of the unified fire codes covering most of the 4 countries making up the UK, there has been an increased need for the inspection of all business premises. This market is flooded with a wide range of 'fire risk assessors' some regulated, some not. Jerry Quayle & Associates offers tailored inspection service concentrating on fire doors but covering all other types of the passive fire products and systems.

ASSOCIATES

Since the start-up of his consultancy in Texas, Deg Priest (www.priestassociates.com) an ex-Technical Director of Building Products for Intertek Testing Services Inc and original owner of the Omega Point Laboratories (Texas) has involved Jerry in its business model, offering our services to his client base. The company reciprocates and the process makes our group truly multi-national.

In order to compliment the Company's service offering our Associate company in Spain Kolumbarium Consulting SLU, ([website](#)) whose principal Cesar Palomar is extremely well known in the Iberian peninsula and has excellent links to all the Spanish fire testing providers and indeed has an Indicative testing facility in the Basque region close to Bilbao.

OTHER SERVICES

Being involved in the fire industry with doors and glass, Jerry Quayle, has been asked by many providers of such products about bullet and blast resistance and we are pleased to say we have linked up with a provider of expert opinion and advice via [CFH Sa'eqa](#) (who have been designing and building these specialist products for more than 30 years), providing solutions to USAF, British Air Force and NATO.

PRODUCTS

Having been extensively involved in the product certification industry and seeing that the easy access to calibrated measurement devices can be very difficult, the Company is able to supply pre-calibrated measurement devices for the wood and steel door fabrication industry especially

in into the MENA region, who lack this type of equipment.

CLIENTS

- QAI Laboratories Inc
- Intertek Testing & Certification Ltd
